

NIEMEYER 1985 *design Oscar Niemeyer*

Product: RECTANGULAR DESK

In 1985 Estel commissioned Oscar Niemeyer to create a conference table. What he imagined fully interpreted the dual vocation of the Italian design company, knowing how to smoothly move between home and office. The table, designed both for home interiors and for office executive spaces, is characterized by an important base: one single sculptural leg made in wood covered with brushed steel, with internal counterweight plates. The top can be either in transparent glass or in a vast choice of solid woods. Presented also in the double version, it can reach a length of 4.5 meters.

A Niemeyer's unmistakable signature, with its metal base in relief projecting a plastic form: this table designed for Estel, is one of the few pieces the Brazilian architect dedicated to interior design.

TECHNICAL FEATURES

Top

The top is made of 20 mm to 40 mm thick solid wood rounded off on the corners or made of 19 mm thick tempered float glass.

Base

Base made of coated marine plywood; there are counterweight plates inside

Electrification

Cables passage on the base.

MAINTENANCE

For cleaning use a soft cloth, possibly a microfiber cloth and neutral soap diluted in water.

It is absolutely forbidden to use abrasive powders, acetone, trichloroethylene, ammonia and all agents containing these.

FINISHES

Solid Cat. A: Maple, Barrique oak

Solid Cat. B: Hickory, Wengé, Zebrano

Base metal: satin stainless steel, natural copper, matt brass

Rectangular solid desk, satin stainless steel base
