

SIT & STAND WORKSTATION

EVO HP features an height-adjustment system for Sit&Stand workstations, according to EN 527-1:2011. Each worktop is individually adjustable.

Technical features

Worktop: each worktop is 180x80 cm wide, th. 30 mm, made with chipboard panels with anti-scratch and anti-reflection melamine finish; PVC edges, th. 2,5 mm.

Structure: tubular S/Steel profiles. Cable tray in S/Steel mesh. Sockets mounted on metal carter. Socket tray (under top) in S/Steel mesh.

Front Panel: compositions can be integrated with a front panel, upholstered with fabric. On single desk, the front panel is fixed to the worktop, on benches it is mounted on the S/Steel structure;

Sit & Stand height adjustment

Height adjustment system allows to switch from a sitting to a stand-up working position. Lifting columns are state-of-the-art models, whose motors have remarkable power, speed and low-noise characteristics. Lifting system is controlled by a centralized control box. Switch button is placed on the worktop,

Electrical features

Electrical connection for worktop is made by a top access panel, installed on worktop, to access to the S/Steel mesh tray where sockets are installed;

Finishes

Top: Melamine finish with PVC edges;

S/Steel structure: matt lacquered;

Front Panel: Smart Office Textiles;
