

Product: PHONE BOOTH

Analysing the disturbance and distraction aspects involved in the open space environments, the phone always covers the leading positions. *Kite Phone Booth* is the answer to these needs that the designer Jorge Pensi has interpreted with the right touch of design. Each *Phone Booth* is designed to accommodate two people. The construction and the material used allow phone calls without disturbing the work of others. The compositions are hung on the wall, generating a highly soundproof intimate space.

STRUCTURE

Kite Phone Booth is made of a fire-retardant wooden supporting structure and a filler in semi-rigid Polyethylene foam with a cells system in different diameters which ensures the best performance in terms of absorption and insulation.

The various components are upholstered in Sprint fabric.

Phone Booth is sold pre-mounted.

Phone Booth available with circular or square front panel.

WALL FIXING

The structure can be mounted on the wall by means of a metal plate, to which the Phone Booth is hanged and screwed. Once installed the Phone Booth, the metal plate is completely invisible.

FINISHES

The product is upholstered with stretch SPRINT fabric.

COMPOSITION: 100% Polyester; 328 g/sqm; resistance to abrasion > 100.000 Martindale cycles; fire resistance BS EN 1021 – 1:2006, BS EN 102, BS EN 1021 – 2:2006, BS 7176:2007.
